

## ATTACHMENT E

### PRE-OPERATIONAL WELL TESTING PLAN

#### 1. FACILITY INFORMATION

Facility name: River Parish Sequestration – RPN 5

Facility contact: Andrew Chartrand, VP, Regulatory and Environmental  
1333 West Loop South, Suite 830, Houston, TX 77027  
832-696-0052, andrew.chartrand@blueskyinfrastructure.com

Well name/location: RPN-5-INJ, Iberville Parish, Louisiana

#### 2. INTRODUCTION

The RPN-5-INJ will be a newly drilled well, constructed to Environmental Protection Agency (EPA) Class VI standards. The testing activities at the RPN-5-INJ facility described in this attachment satisfy the requirements of 40 CFR 146.87 and are restricted to the pre-injection phase. River Parish Sequestration, LLC (RPS) will provide a descriptive report prepared by a knowledgeable log analyst that includes an interpretation of the results of the tests and logs described herein, as required by 40 CFR 146.87(a). Testing and monitoring activities during the injection and post-injection phases are described in the Testing and Monitoring Plan (**Attachment F**), [REDACTED]

#### 3. PRE-INJECTION TESTING PLAN – INJECTION WELL

The following tests and logs will be conducted during drilling and casing installation, as well as after casing installation in accordance with the testing required under 40 Code of Federal Regulations (CFR) 146.87(a), (b), (c), and (d). [REDACTED]

### **3.1. Deviation Checks**

### **3.4.1. Internal Mechanical Integrity Testing – Annulus Pressure Test**

[REDACTED]
------------

#### ***Annulus Pressure Test Procedures for Injection Well:***

1. RPS will comply with all reporting and notification provisions.
  - a. EPA Underground Injection Control (UIC) Program Director and Louisiana Department of Natural Resources (LDNR) Office of Conservation Commissioner will be notified 30 days in advance of planned testing efforts per 40 CFR 146.87(f).

#### 4. PRE-INJECTION TESTING PLAN – MONITORING WELLS

Monitoring wells will be evaluated during the pre-injection period. The following testing and logging plans apply to all wells listed in **Table 4-1**.

#### **4.4. Demonstration of Mechanical Integrity**

**Table 4.4-1: List of MITs that will be performed on the in-zone monitoring well**

A large rectangular area of the page is completely blacked out, redacting the content of Table 4.4-1.

#### **4.4.1. Internal Mechanical Integrity Testing**

A large rectangular area of the page is completely blacked out, redacting the content of the first table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the second table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the third table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the fourth table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the fifth table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the sixth table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the seventh table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the eighth table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the ninth table under section 4.4.1.A rectangular area of the page is completely blacked out, redacting the content of the tenth table under section 4.4.1.

**5. WITNESSING OF PRE-OPERATIONAL WELL TESTING**

In compliance with 40 CFR 146.87(f), RPS will submit a schedule of the proposed tests and logs at least 30 days before conducting the first test to allow the UIC Program Director and the Office of Conservation Commissioner the opportunity to witness these tests. Changes to the testing schedule will be submitted at least 30 days prior to the next scheduled test.
